What's New in the?

Pedigree Viewer was written for Windows (95, 98, ME, NT, 2000, XP, Vista, 7), but it could also run under Unix with Motif. This software has been tested on WinXP and Vista. Version 3.1.00 - added help file to the setup executable. Fixed truncate in files added to clipboard. Fixed crash when changing report type. (read in Autosave) Version 3.0.00 - added autosave facility. Improved output area so that colours are retained.Changed architecture to avoid clipboard issues on Vista.Changed functions to be more correct with ANSI C coding and to avoid problems on MSIE. Version 2.9.01 - removed 3D cube from the title frame because the

Microsoft version of Mathematica cannot open it in XP. Version 2.8.01 - improved download/install for non-WRT clients. Version 2.7.00 - added support for three-dimensional view. Version 2.6.00 - improved format/compression of pedigrees. Added new Trait: Expected Production Date (EP). This is calculated from Birth Date in the Date column of the data file and recalculates for each new generation. Option to use First | Last Names instead of PID# for identity. ReportName now takes the highest level Name and all lower-level names are prepended. Animal Name column displays correct name for pedigree records that do not have one. If using more than one data file, all files are read in and then combined and written out, and this is picked up as the report for the reportName. Version 2.5.00 - Added new Trait: Expected Pregnancy Date (EPD). This is calculated from Pregnancy Date in the Date column of the data file and recalculates for each new generation. This is useful for breeding animals that are expecting and as part of an mated pair. New option: 'Enable Animal Names/PIDs'. If selected, the PID# is used as the animal's identity and all lower-level names are prepended and all names are shown. The animal identity is also used in the last name, and when a numeric value is used, then this is displayed in this column. Version 2.4.00 - improved speed. Fixed a problem with renaming the file if the file name was already used. Version 2.3.00 - improved speed.
