I assume that SH-1 is the name of the effect. I use the package called Digital Effects. I used the FL1-SH2-12SP-S. And I'm using with Logic. If I created the SH-1 Graphic EQ as the Graphic EQ that based on IIR Filter. I can hear the output of effect by Bass. A: The term digital effects is used to refer to effects that can be added to audio after its has been captured or created on-board a piece of audio equipment. A "digital effect" is something that you can add to a recording/performance/recording/performance... which is why you often see the terms digital effects processor and digital effects processor. When I hear the term effects processor, it usually refers to an equipment unit which is built for one purpose, and it performs only a single type of effect. The term "effects processor" is used to refer to a unit that can be configured to perform a variety of effects
